Quick Tip - numbered lists

1. When typing a numbered list:
 - a. Use the tab key to move the indentation to the right (and thereby automatically changing the number/letter accordingly)
 - b. And use the shift + the tab key to move the indentation to the left.
2. After typing the previous sentence and pressing enter to move to the next line of my list, I used shift+tab to change the numbering from "c" to "2" and move the indentation to the left.
